Gusti Muhammad Adzaky

Fresh Graduate Informatic Engineering
Pontianak I West Borneo, Indonesia

Summary

I am a passionate software developer eager to continuously learn and gain experience in web and mobile application development. I have an educational background in computer science and I am always excited to learn new technologies. I have a basic understanding and can implement several programming languages. Additionally, I also possess skills in database management. I enjoy working in teams and am always seeking ways to improve myself in every project I undertake..

Experience

Freelance (Self employed)

E-Commerce Website Development at Margalas.com using Laravel(Web Developer)

October 2023 - February 2024 (5 months)

Pontianak I West Borneo, Indonesia

Developed a comprehensive web application for margalas.com, incorporating features such as dashboard creation with Laravel UI authentication, admin and customer role management using Laravel's CheckRole function, Dom Pdf integration for sales reports and invoice generation, Captcha implementation for login security, Chart.js for visualizing purchase data, Cronjob setup for monthly database maintenance, pagination for Our Services menu categories, database migration, purchase system development sans payment gateway, CRUD functionalities for services and spare parts, Gallery management with Create, Read, and Delete capabilities, contact system integration for logged-in visitors, Testimonial and star rating feature integration on the home page, all within an attractive and responsive web design.

Freelance (Self employed)

Web Optimization TSP Development Using Algen at J&T Pontianak using Codeigniter(Web Developer)

March 2022 - May 2022 (3 months)

Pontianak I West Borneo, Indonesia

From designing the web interface from scratch to its completion, including UI/UX creation and wireframing using Figma, to implementing the login feature, developing CRUD functionalities on the dashboard encompassing Menu Options for estimated kilometer costs input, Delivery Group menu, integration of data points via Google Maps API and places library, weight menu with distance matrix calculations using JavaScript, count menu generated through a native genetic algorithm model, and saved route menu. Additionally, crafting a responsive and interactive user experience, and visualizing maps utilizing Google Maps API with graphs to address the Traveling Salesman Problem.

PT. Kreasi Putra Hotama

Internship in Full-stack Web Development with a focus on Restful API for Podcast Simulation using Codeigniter

March 2022 - May 2022 (3 months)

Pontianak I West Borneo, Indonesia

Creating and designing a RESTful API along with an admin dashboard for podcast simulation within the Qara'a application.

Freelance (Self employed)

Freelancer Web Development for RSUD Purwokerto's Nutrition Catering With Php Native.

January 2022 - March 2022 (3 months)

Pontianak I West Borneo, Indonesia

I freelanced in web development for RSUD Purwokerto's nutrition catering, designing the site from scratch, implementing PHP Native for admin and user features, providing CRUD on the admin dashboard, and integrating a direct ordering feature via WhatsApp with a user registration-only database.

Freelance (Self employed)

Freelance Web Development use Codeigniter for Rabbani Store's E-commerce in Pontianak.

November 2021 - February 2022 (4 months)

Pontianak | West Borneo, Indonesia

I developed and designed the Rabbani Store's Pontianak e-commerce platform, implementing a 2-role authentication system for admin and users, along with a simple payment system without a payment gateway. Additionally, I incorporated pagination for improved user experience, integrated Raja Ongkir API for shipping cost calculation, added Email Delivery feature, and utilized TCPDF for generating Invoices. The interface was designed to be responsive and interactive, and database migration was performed as part of the project.

Education

Muhammadiyah University Pontianak
